Town of Torrey, Board of Supervisors

RE: Greenidge Generation, LLC

Dear Town of Torrey Board of Supervisors:

As one wishing to preserve the environment of Seneca Lake and its tributaries, I share a grave concern, as do others, regarding the excessive thermal pollution of the Keuka Outlet on behalf of Greenidge Generation, LLC in the town of Torrey, NY. Due to an overwhelming scientific consensus regarding thermal pollution of water supplies and additional threats posed by the intake process (fish entrapment at intake pipe), I urge our community's elected officials to take action.

I would ask that their recent expansion of operations, adding four more buildings stuffed with computers for lucrative bitcoin mining operations, be tied to the requirement of using a closed water cooling system which will not cause injury to the Keuka Outlet nor nearby Seneca Lake. I would also ask that all environmental studies, long overdue, be promptly implemented regarding operations at said facility, and before the recently proposed expansion of operations takes place.

I look forward to hearing how the town of Torrey will combat these threats posed by the Greenidge facility, and how we might protect Seneca Lake together.

Sincerely,
