

Lockwood Ash Storage Landfill

- Ash stored from Greenridge coal fired power plant , borders and drains to the Keuka Outlet near Rt.14
- Site includes an unlined leachate and storm water collection pond
- 2015 DEC determination - “groundwater at site contains substances in excess of the duly promulgated water quality standards ...”
 - Boron, Manganese, Magnesium, Iron, Sodium, Sulfate
- DEC order to eliminate the discharge and monitor groundwater
 - No approved plan to date

Lockwood Ash Storage Landfill

- SLPWA is monitoring out of compliance list of metals
- Sponsored by the Committee to Preserve the Finger Lakes, with financial support from Freshwater Futures
- Three Outlet samplings in 2015-16, up and down stream of the pond outflow site
- No concerns found in testing to date
- Solid baseline of data in place, for future comparison
- Effort now on hold, awaiting approved site plan and action
